

ABOUT ME

I have been a COA registered freelance architect and urban designer (CA/2022/151195) for two years, working predominantly on residential projects, dealing with planning, modeling, and rendering, while providing working drawings and detailed drawings.

As a recent graduate in urban design, my journey in urban design has been driven by a passion for creating inclusive urban development, as we can see exponential growth in our country.

My professional experience includes working with DULT on street design, road safety, junction and street geometries of the Pulikeshi Nagar project in Bengaluru and also, I'm familiar with commercial and institutional projects during my training period at Studio 69.

I'm a self-motivated and analytical thinker who strives to give best results in constrained scenario's and looking forward to work along the best team to perceive more technical knowledge and on field experience by being a flexible team member.
